EXPERIMENT 1

Execute and display the results for the following commands in Kali Linux Operating Systems:

rm command

users command

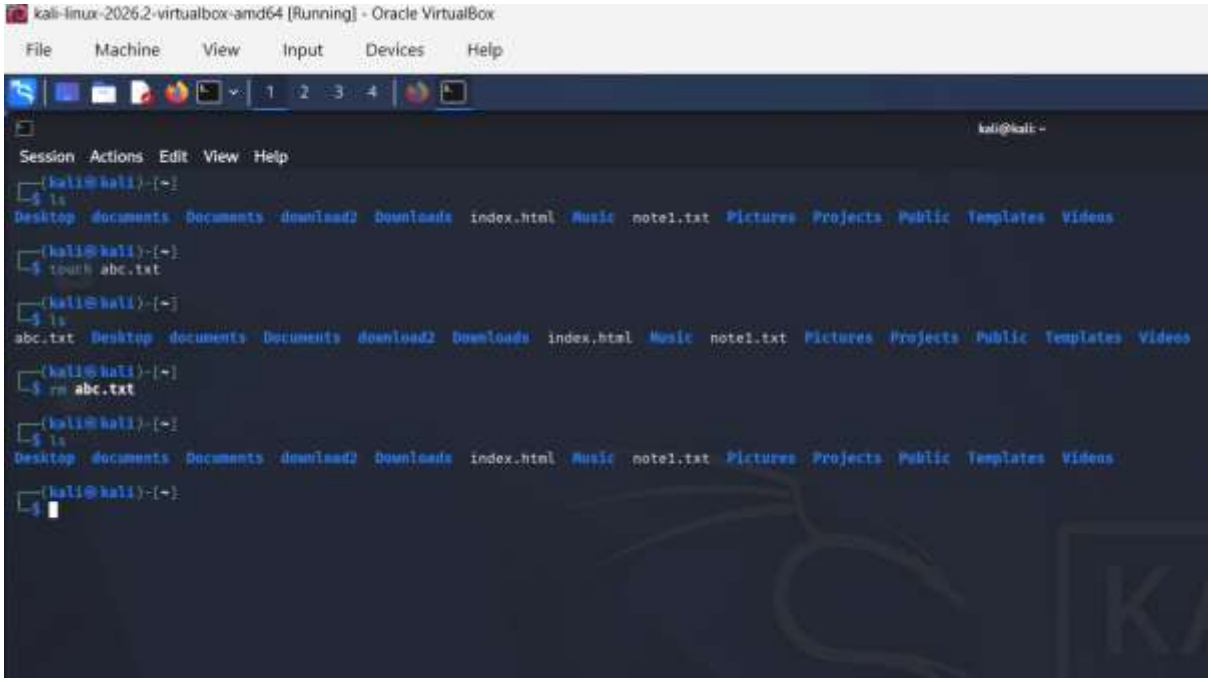

tree command

AIM : To execute and study the rm, users, and tree commands in the Kali Linux operating system and observe their outputs.

DESCRIPTIONS

1. rm Command

The rm command is used to remove or delete files and directories in Linux. It permanently deletes files without moving them to the recycle bin.

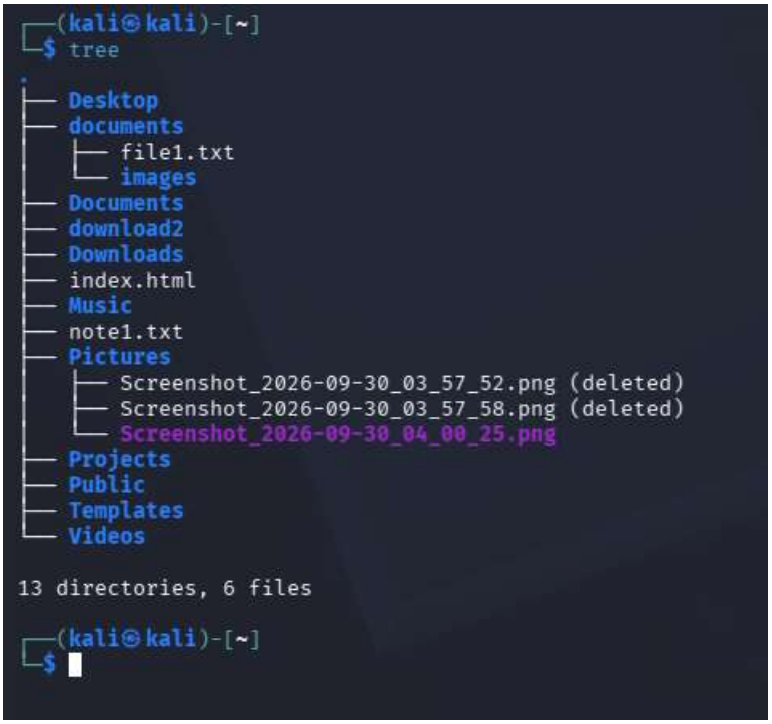

2. users Command

The users command is used to display the usernames of users currently logged in to the Linux system.

3. tree Command

The tree command is used to display files and directories in a hierarchical, tree-like structure. It helps users understand the organization of files and folders.

RESULT : The rm, users, and tree commands were successfully executed and their outputs were observed in the Kali Linux operating system.
