EXPERIMENT 5

Execute and display the results for the following commands in Kali Linux Operating Systems:

uptime command

date command

mv command

AIM : To execute and study the uptime,date, and mv commands in the Kali Linux operating system and observe their outputs.

DESCRIPTIONS

1. uptime Command

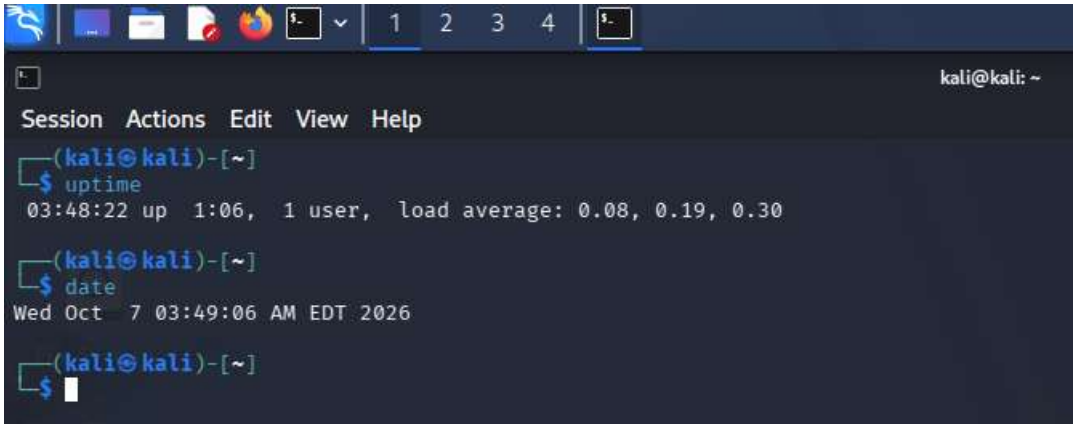

The uptime command displays:

- Current system time
- How long the system has been running
- Number of logged-in users
- System load average

2. date Command

The date command displays the current date and time of the system.

3. mv Command

The mv (move) command is used to:

- Move files or directories from one location to another.
- Rename files or directories.

RESULT : The uptime, date, and mv commands were successfully executed in Kali Linux. The uptime command displayed the system running time and load information, the date command displayed the current date and time, and the mv command was used to successfully rename a file.
